

Some Key benefits of EWOT

To get the best results for your health, Infinity Wellness Solutions provides Medical Far Infrared Sauna/ Valkion oxygen and NOW **EWOT or Oxygen Enhanced Therapy**. EWOT provides many benefits (see our comprehensive information brochure). This along with this our experienced practitioner that, focuses on treating the underlying causes and looks to review pathology (blood, urine, saliva, etc) to assist identification of areas needing focusing and restoration for optimal health.

Some benefits of EWOT are:

- Dramatically increase oxygenation of the tissues and cells
 - Recover from stress related illnesses
- Prevent age related diseases such as cancer, macular degeneration, cataracts, diabetes, chronic fatigue, fibromyalgia, 'non healing' wounds (and so much more!)
- Slow down (or Reverse!) the process of aging
 - Increase the diameter of the blood vessels (capillaries) that provide oxygen and nutrients to tissues and cells
 - Recover from jet lag
 - Stimulate the Immune System
 - Lose weight
- Raises the arterial pressure back to youthful levels. And what's just as important is the effect is long lasting!

Do you have chronically low oxygen saturation of your blood? EWOT can reverse this!

Please ask for more information on the above if needed.

information

BRIEF INFORMATION

EWOT or O2 Enhanced exercise at Infinity Wellness Solutions is a unique system employed with comprehensive pathology (blood, urine, saliva etc) analysis to assist and resolve underlying biochemical processes to achieve total health/wellness and longevity.

We also have Medical Far Infrared Sauna/Valkion Air treatments available to used separately or along with EWOT to achieve a maximum beneficial result.

Infinity Wellness Solutions has also a unique formula developed, that can be used prior to EWOT to enhance delivery of oxygen and therefore receiving greater benefit from your therapy time.

We embrace an holistic approach to healthcare and also have a functional approach to health to ensure the best result and identification of the underlying cause to un-wellness or ill-health.
